Cosmic voids contain a mix of galaxies and matter that is slightly different than other regions in the universe. this unique mix supports the biased galaxy formation picture predicted in gaussian adiabatic cold dark matter models. With this post we begin a monthly discussion of the cosmic doctrine by dion fortune, which i consider the most important work of 20th century occult philosophy. climb in and fasten your belts; it's going to be a wild ride. as noted in earlier posts here, there are two widely available editions of the cosmic... In general relativity, an event horizon (eh) is a region in spacetime beyond which events cannot affect an outside observer. in layman's terms, it is defined as the shell of "points of no return", i.e., the boundary at which the gravitational pull of a massive object becomes so great as to make escape impossible. 1. fine-tuning for life: the evidence 1.1 examples from physics. our best current theories of fundamental physics are the standard model of elementary particle physics and the theory of general relativity. The very first free will "problem" was whether freedom was compatible with intervention and foreknowledge of the gods. before there was anything called philosophy, religious accounts of man's fate explored the degree of human freedom permitted by superhuman gods.
